

Abdelrahman Mahmoud

Full-Stack Developer & AI Automation Engineer

Giza, Egypt | bedonassef71@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Upwork](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience designing and shipping production SaaS platforms, AI-powered tools, and queue-driven automation systems. Specialized in NestJS, Next.js, Xano, and n8n, with deep experience in multi-tenant architecture, real-time systems, and AI integration (Claude, OpenAI, Gemini, Twilio Voice). Top Rated on Upwork with 100% Job Success Rate, 5.0 client rating, and 1,885+ hours delivered. Native Arabic and fluent English speaker, available for high-impact backend and full-stack engagements.

TECHNICAL SKILLS

Backend: NestJS, Node.js, TypeScript, Laravel, PHP, Python (FastAPI), GraphQL, REST

Frontend: Next.js 15, React 19, Flutter (Dart), Tailwind CSS, JavaScript, HTML5, CSS3

Databases & ORMs: PostgreSQL, PostGIS, MySQL, Redis, TypeORM, Drizzle, Prisma

Cloud & DevOps: AWS, Google Cloud (Cloud Run, Cloud Functions, Vertex AI), Docker, Linux, GitHub Actions, CI/CD

Queues & Real-Time: BullMQ, pg-boss, Socket.io, WebSockets, Server-Sent Events

Automation & No-Code: n8n, Xano, Zapier, Make

AI / LLM: Claude (Anthropic), OpenAI, Google Gemini, Vertex AI RAG, Voice AI (Twilio + Gemini Live), HeyGen, ElevenLabs

Payments & Integrations: Stripe Connect, Stripe Escrow, Twilio, PhantomBuster, FCM/OneSignal

Architecture: Multi-Tenant SaaS, Microservices, Event-Driven, Queue-Based, RBAC, Circuit Breakers

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Part-Time)

April 2026 – Present

RSTM Immigration Services

- **Building** features on a multi-vertical Next.js 15 marketplace platform with React Server Components, Drizzle ORM, and Neon PostgreSQL.
- **Contributing** to the monorepo's shared packages — including the multi-channel notification engine, NextAuth v5 session layer, and Stripe Connect payment flows.
- **Implementing** schema, server actions, and route handlers across multiple verticals with strict TypeScript and Zod validation at every boundary.

Full-Stack Developer (Part-Time)

February 2026 – Present

Just Hired AI

- **Engineered** the Automated Content Engine (Phantoms) — a multi-tenant NestJS platform integrating Claude, HeyGen, and n8n for end-to-end script-to-social-media automation.
- **Developed** core systems for Inroads, a job-referral network turning professional circles into a credit-based introduction marketplace.
- **Designed** queue-based task distribution using BullMQ and Redis for asynchronous processing of 1,000+ events with retry, dead-letter queues, and circuit breakers.

Full-Stack Developer & AI Specialist

August 2025 – Present

Corporate Synergy Solutions

- **Architected** a multi-tenant SaaS backend for an auto-detailing chain handling 1,000+ daily bookings across multiple locations.
- **Implemented** AI photo analysis using vision models for instant job quoting, reducing manual estimation time by 80%.
- **Built** real-time scheduling with bay availability rules, eliminating double-bookings; integrated Stripe with HMAC-validated webhooks.

Full-Stack Developer

October 2024 – Present

TSR Ventures & Solutions

- **Designed** a custom PHP framework with reusable modules, improving team development velocity by 40% and reducing codebase redundancy by 30%.
- **Built** a Digital Asset Management System processing 10,000+ media files with automated metadata extraction and indexing.

- **Developed** an automated content generation pipeline integrating Claude AI, HeyGen, and n8n — from script creation to social media distribution.

Backend Developer

January 2024 – March 2024

Panel Misr

- **Developed** the company website and admin dashboard from scratch using Laravel.
- **Built** an e-commerce platform with inventory management and order tracking.

FREELANCE EXPERIENCE

Independent Full-Stack Developer (Upwork)

2024 – Present

Top Rated • 100% Job Success Rate • 5.0 Rating • 1,885+ Hours

- **Delivered** 8 client engagements across SaaS architecture, AI agent development, voice AI, and Xano backend implementation.
- **Earned** consistent 5-star reviews and long-term client relationships, with multiple repeat-client engagements ongoing.
- **Specialized** in rapid MVP delivery using Xano and full-stack production builds using NestJS + Next.js.

FEATURED PROJECTS

Phantoms — AI Video Content Generation Platform

NestJS • BullMQ • Claude AI • HeyGen

- **Designed** a multi-tenant SaaS automating the full content lifecycle: AI script generation → avatar video rendering → multi-platform distribution.
- **Implemented** Redis-backed circuit breakers per tenant per provider, dead-letter queues, optimistic locking, and three-layer tenant isolation across 23 NestJS modules.
- **Engineered** a 17-dimension Content DNA performance vector feeding back into Claude prompts, creating a self-improving content generation loop.

Digital Workforce — Voice AI Agent Platform

Xano • GCP • Gemini Live • Twilio • Vertex AI RAG

- **Built** an end-to-end multi-tenant platform for deploying AI agents over chat and real-time voice channels, with snapshot-based agent versioning.
- **Engineered** a custom bidirectional bridge between Twilio ConversationRelay and Gemini Live API on FastAPI/Cloud Run for low-latency voice conversations.
- **Implemented** RAG ingestion across GCS, Google Drive, and HTTPS sources, normalized through Vertex AI RAG Engine with per-tenant knowledge corpora.

RSTM — Multi-Vertical Marketplace Platform

Next.js 15 • Drizzle • Neon • NextAuth v5 • Stripe

- **Contributed to** a 21-vertical multi-tenant marketplace monorepo with 27 shared packages, 51 schema files, and React Server Components throughout.
- **Implemented** a four-channel notification engine (email, SMS, push, in-app SSE) with preference enforcement, bulk delivery, and pg-boss queue retry.
- **Built** Stripe Connect onboarding, escrow with milestone release, multi-vendor checkout with tax calculation, and 8-tier RBAC.

Inroads — Queue-Driven Networking Marketplace

Xano • PhantomBuster • Wiza

- **Architected** a credit-economy marketplace for LinkedIn introductions across 24 tables, 43 API endpoints, and 7 scheduled cron jobs.
- **Designed** an immutable double-entry credit ledger with balance-snapshot drift detection and idempotent webhook handlers.
- **Built** a database-driven phantom pool with circuit breaker, automatic LinkedIn session recovery, and cohort-based connection sync scheduling.

EDUCATION

Bachelor of Science, Computer Science

2020 – 2024

Helwan University, Egypt

LANGUAGES

Arabic — Native • English — Fluent (Professional Working Proficiency)
